THE COMPANY

RECOLIM is a 100 % Spanish company established in 1978 by three shareholders from Valencia to carry out services to the public and private sector.

As of today, there are many companies in this sector, however only a few companies can truly boast such a long career. Recolim has more than 300 employees in its different services locations around the Valencia and Aragon regions.

Concerned in the quality and the environment we are certificated in norms: ISO 9001-2008 and ISO 14001-2004.

CLEANING SERVICES

In our wide expertise, we have been carrying out cleaning services to different governmental sector premises for 35 years.

In this period of time, there has not been a day that Recolim ceased providing cleaning services to its public customers. Also we provide cleaning services to private customers and the industrial sector such as offices, condominiums, private health centers, shopping stores and industrial plants.

Recolim has highly trained and well managed staff to provide special cleaning services in high glazing surfaces, ceilings, floor polishing, etc. Our special team has at its disposal the ultimate technology in tools and machinery.

SPORT PREMISES

Recolim is a newcomer in the sport sector. Recently we have been awarded the management of two big sport facilities in the city of Valencia.

These sport facilities belong to the municipality who outsourced the management to the private sector in a concession for a period of 15 years.

Recolim is looking for a growth in this sector for the coming years to achieve a consolidated place in the sport market.

ANCILLARY SERVICES

Recolim offers a specialized ancillary assistance to its customers. We provide telephone and reception staff services, specialized information services in meetings, museums, exhibitions, and also VIP information services.

All our human resources are carefully selected and well trained before the start up phase.

Recolim has its own ancillary services agreement which give us the opportunity to provide our customers a quality and competitive price service.

PRIVATE HOME HELP SERVICE

Recolim has created a private home help service. Our intention is to provide an adapted service to all people who need specific attention different from what the community carries out in its public home help.

For this reason we can adjust our offer to the client's availability and specific needs. Therefore our clients can choose the range of services they want to receive from the company.

It's our aim to deliver to the market a private help care service of quality and flexibility to meet the needs of our clients.

INTERNATIONAL DEVELOPMENT

Recolim has recently reached an agreement with a Middle Eastern company to create a joint venture.

With this joint venture we will try to export our knowledge and experience in the facilities services sector to this area of the planet which demands for a qualified manpower and specialized services that only companies with huge expertise can provide.

We can also provide you a wide range of services such:

- Cultural animation services
- Free time management
- School transportation
- Parking areas management

Visit our website or contact us to talk about our products and services.
